CHOOSING THE RIGHT STEEL SHUTTER FOR YOUR BUSINESS

STEEL ROLLER SHUTTERS

OUR PROMISE. YOUR PROTECTION.
Introduction

Steel roller shutters can be a great solution for any business, no matter your reasons for needing them.

Whether you’re after extra insulation, security or high visibility we offer an extensive range of steel roller shutters for business.
Heavy Duty Security Rated Steel Roller Shutters

Perfect for any business, these roller shutters are highly effective at deterring thieves and preventing break-ins. With a variety of police accredited security ratings, these roller shutters are LPS1175 certified and Secured By Design accredited.

Our heavy duty security roller shutters act as a great defence against a variety of break in methods including forced entry through the use of bodyweight, crowbar, axe and many more. These heavy duty roller shutters are the answer to protecting doors and windows, which are seen as the most vulnerable parts of a building.

Perforated Steel Roller Shutters

If you need to protect your assets whilst still allowing customers to see through the shutters, perforated steel roller shutters are the answer. These roller shutters have small holes that allow for effective airflow and visibility.

Commonly used for commercial properties including shops, public buildings like hospitals and libraries as well as educational institutions like universities and schools. These perforated steel roller shutters are the lightweight solution to a steel shutter that still offers an extra layer of protection against theft, without compromising airflow and visibility.
Insulated Steel Roller Shutters

Combining a high level of security protection and great insulation, you can protect your premises whilst improving energy efficiency with our insulated steel roller shutters. Due to the excellent insulation properties these insulated roller shutters also provide a degree of sound reduction.

Insulated roller shutters are made of a double skinned steel slat with polyurethane foam insulating core that offers great protection from heat loss, therefore reducing energy costs considerably when compared to single skin shutters. Common uses for these insulated roller shutters include warehouses, factories, and loading bays where energy efficiency is needed to protect products and machinery whilst minimising premises running costs.

Our variety of Roller Shutters can suit any need, just pop us an email and we can help you out

Punched Steel Roller Shutters

Punched steel roller shutters offer a higher level of visibility than perforated roller shutters due to the large punched openings. Commonly used in the retail industry for secure protection whilst being able to keep products on show, these roller shutters are popular with shop owners.

There are a variety of options available depending on your business’ aesthetic needs, including the arrangement of the punched holes and a range of colours. These punched steel roller shutters are also great for bars due to the high visibility factor, drinks can be on show without compromising security when the bar is closed.

Not quite what you are looking for? Our Tube & Link Shutters are an elegant alternative designed to secure your bar without compromising the aesthetics of the surrounding area. Protecting against theft, without compromising airflow and visibility.
Steel Sliding Doors

Steel sliding doors are perfect for large warehouses that struggle to find the right sized steel door. These steel doors are commonly used to cover up very large apertures and can be secured and locked to protect any assets inside.

Although not able to offer the same security protection as regular steel doors, these are perfect for aircraft hangars. Made from solid steel, they run on wheels and runners along the top of the aperture meaning that the full aperture can be easily opened.
Solid Steel Roller Shutters

The most popular solution for protecting your premises from unauthorised access. Solid steel roller shutters are great for adding an extra layer of protection against vandalism. These roller shutters also are very tough and durable benefiting from a long service life.

To ensure that any roller shutters perform at their optimum level, make sure to get your roller shutter serviced once a year. Our team of engineers are highly experienced at roller shutter servicing, ensuring that your roller shutter is complying to health and safety regulations.
