

AIRCRAFT HANGAR DOORS

AIRCRAFT HANGAR DOORS

N80-NK Model

PRODUCT DESCRIPTION

UK Roller Shutters and Garage Doors are pleased to offer a great number of solutions to customers who need doors spanning great distances. Our UKRS-280-NK4 model uses a rigid frame construction making them ideal for large-scale exterior door locations such as aircraft hangars, in all sizes from military planes to jumbo jets.

Our hangar doors are designed to withstand fluctuations in moisture levels and temperature; they are resistant to dirt, dust and wear, and stand up to even the most violent winds.

The 280-NK4 model features two insulation layers to aid with heat and noise insulation. The width and height is not limited thanks to the elevating support post system; it is a great choice for extra wide and extra high doorways up to A380 aircrafts.

Why use a UKRS Hangar door?

Our hangar doors are lightweight but durable. They do not need extra heavy support structures like many other hoist-up fabric hangar doors on the market, which significantly helps reduce the construction costs.

The large partition-free doorways for aeroplane and helicopter hangars and maintenance rooms require doors with special properties. The fabric can be equipped with soundproofing, thermal insulation and burglar protection.

The 280-NK4 Warm hangar door model is the only hangar door on the market with additional thermal insulation. This helps keep down the costs that arise from the hangar heating and cooling. In this way, UKRS is a reliable choice from extremely cold arctic areas to scorching hot climate.

UKRS Hangar door fabric features

The fabric is extremely durable against wear and tear, and it is fixed without rivets. Fabric looks tidy and it is easy to maintain or change in parts with low maintenance costs. The door fabric can be partially or entirely translucent, or it can be equipped with windows. Burglary protection is available as an option.

IDEAL USES

- Hangar doors
- Boat yard doors
- Anywhere with very large openings

KEY FEATURES

- Can be used on unlimited sized apertures
- Provides great heat and sound insulation
- Lightweight

OPTIONS AND VARIATIONS

If required, we are able to polyester powder coat our sliding hangar doors, supplying them in a range of standard RAL colours.
