

A photograph of two men in a workshop. The man on the left is wearing a red and blue plaid shirt and blue overalls, holding a pen and a document. The man on the right is wearing a blue button-down shirt and blue overalls, smiling. They are both looking at the document. In the background, there are shelves with various items and a yellow object. In the foreground, there is a metal tool or part of a machine.

TRANSPARENT SHUTTERS

TRANSPARENT SHUTTERS

UKTPS01

PRODUCT DESCRIPTION

Some environments call for shutters that combine a high level of security with transparency. Our transparent shutters are used in a wide range of situations including retail premises, banks, museums, exhibitions and galleries, where public access is unrestricted, and high value items must be protected.

Made of horizontal strips of virtually unbreakable poly-carbonate, these extremely robust shutters give crystal clear visibility when closed, providing transparency of 83%, and allowing through 92% of daylight. Because it is UV-stabilised, the shutter will not discolour or yellow, and will retain its exceptional clarity for many years.

Because they present a more aesthetically pleasing effect than a completely solid shutter, and because they allow through light to help light an area after dark, this type of solution is popular in town centre conservation areas

IDEAL USES

Any premises where high security and clear, see-through visibility are essential. Including:

- Shops
- Banks
- Museums
- Exhibitions
- Galleries

KEY FEATURES

High security with crystal clear transparency

Ideal for situations where cosmetic appearance is important

TECHNICAL SPECIFICATIONS

Our transparent shutters are made of synthetic links of polycarbonate. These links are built in brick formation making it extremely secure. Shutters retain maximum flexibility and can bend, but cannot crack or break. It is the only transparent façade shutter in Europe to obtain SKG Class 3 certification against the strict European standards ENV 1627-1630.

Shutters are also fire retardant having been awarded Class A certification - the highest European class

of flame retardance.

OPTIONS AND VARIATIONS

We can supply transparent shutters in many different forms to meet specific needs, and the standard system can be upgraded to be classified as Ramraid resistant. The frame can be powder coated any RAL colour and there are mini links for smaller areas.

Available in various versions such as transparent, frosted and ventilated as well as in a transparent version with a coating against scratches and graffiti.

UKTPS-01 Transparent Roller Shutter

Applications

High security commercial sites. The shutter is suited to shops, banks and museums, where both security and transparency are essential. The shutter offers a maximum surface area of up to 50m² mounted externally, and 72m² internally.

Key Benefits:

See through vision & quality

The transparent armour of the UKTPS-01 is crystal clear, offers a transparency of 83%, and allows 92% daylight transmission. Because the UKTPS-01 is UV-stabilised, it does not dis-colour or yellow, and remains crystal clear for many years.

High Security

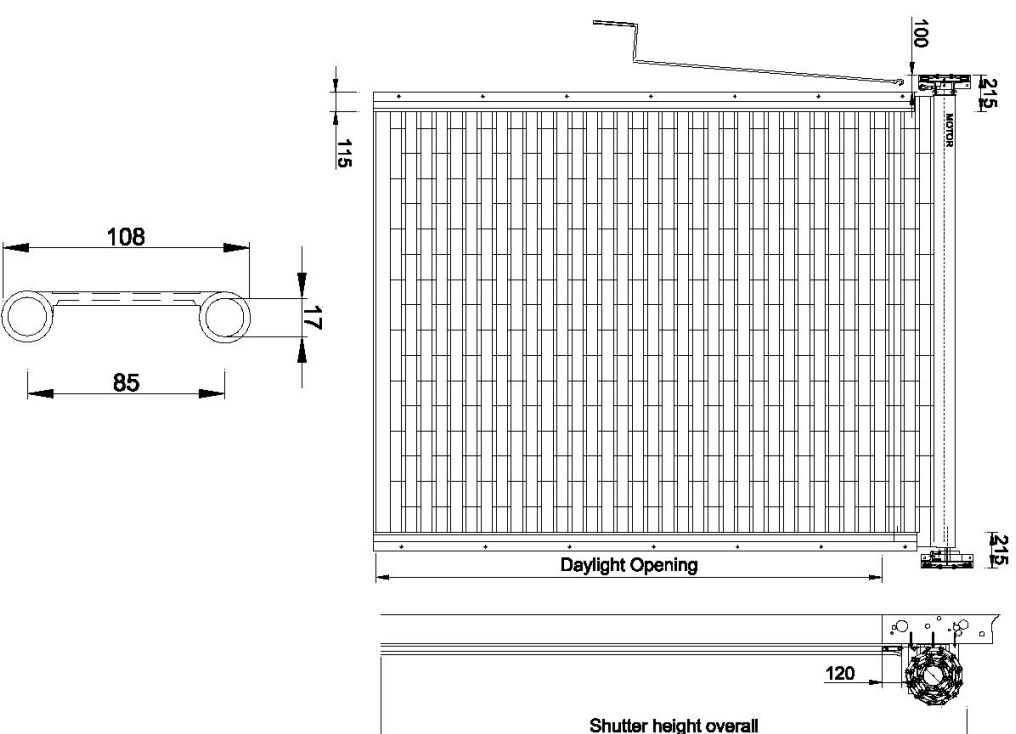

The UKTPS-01 armour is made of synthetic links of polycarbonate. These links are built in brick formation making it extremely secure with a maximum flexibility. UKTPS-01 can bend but cannot crack or break, and is the only transparent façade shutter in Europe that has obtained the SKG Class 3 against the strict European standards ENV 1627-1630.

Fire Retardant

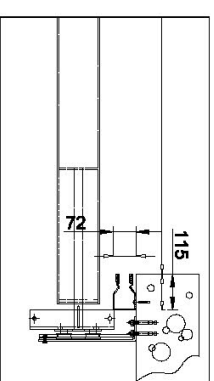

KUTPS-01 shutters have been tested to BS 476: Part 7 (1997), respecting the spread of flame across the surface of a material, achieving the highest possible Class 1 rating. The shutter has also been awarded a Pass according to the Aerospace safety standard ABD0031 respecting smoke and toxic gas emissions.

Product Versatility

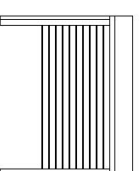

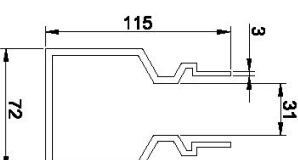

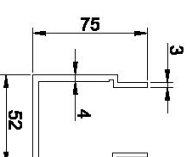

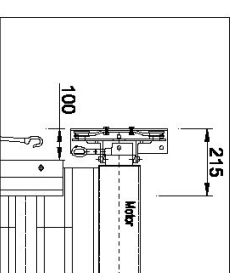

UKTPS-01 shutters are available in many forms and the standard system can be upgraded to classification as Ramraid resistant. The shutter can be powder coated any RAL colour and there are mini-links for smaller areas. UKTPS-01 is available in transparent, frosted and ventilated variants, as well as in a transparent version with a coating against scratches and graffiti.
