

STEEL SLIDING DOORS

STEEL SLIDING DOORS

PRODUCT DESCRIPTION

UK Shutters are able to supply small or large sliding steel doors. They are most commonly used as an external door to cover up very large openings. This is because, not only do they offer a high level of security, but can also serve as a cheaper alternative to a roller shutter. Most recently companies that have wanted to secure apertures in excess of 10m wide, but have only needed a temporary door, have used them.

IDEAL USES

- As hangar doors
- Over very large apertures
- On temporary openings
- On doors that open inwards and where an internally fitted roller shutter would get in the way

KEY FEATURES

- Solid Steel
- Runs on wheels and runners along the top of the aperture so there will be no runner on the floor
- Very secure and lockable

OPTIONS AND VARIATIONS

Finishes

Can be Polyester powder coated in a range of standard RAL colours' for an extra charge.
