50DB**

BESPOKE ACOUSTIC ROLLER SHUTTERS UP TO 50DB

PRODUCT DESCRIPTION

UKRS work closely with a number of international companies and are consequently able to provide quotations for doors up to 50dB although the higher sound reduction shutters tend to come in the form of sectional overhead doors.

Due to the specialised nature of these sound reduction roller shutters, they are normally designed and quoted for on a case by case basis and consequently we are unable to provide any specific specification or drawings.

Normally, however, it may be worth noting that their design will more than likely resemble a sectional overhead door and not a roller shutter. To see what a general sectional overhead door looks like please [click here](#)
